Giant lifting bag w/ inflatable lid – EMG 5618

NOTE: The new 2023 version has an inflatable lid so that rain water can drain off more easily.

- NOTE: The new 2023 version is 1000 KGS WLL.
- The bag is made from a heavy tarpaulin material making it strong and water repellent.
- It uses 2 hooking points which are made of high quality 50mm polyester webbing.
- The lid is closed by velcro and 50mm plastic buckles around the sides of the bag.
- A transparent plastic pocket for A4-documentation or markings is placed in the end of the bag. The pocket is attached by velcro and can be easily removed.
- The bottom cover is made of Acrylonitrile Butadiene Styrene (ABS) Plastic to prolong the life span of the bag and offer weight distribution. It can be replaced, if needed.
- A 20 mm foamed PVC plate is placed inside the bottom of the bag to offer protection and weight distribution.
- The hard walls inside can be removed to ease transportation and storage of the bag.
