# Light Rule – ColRegs Weems & Plath

Light Rule – ColRegs Weems & Plath

If you have ever been on the water at night and have wondered if the beacon lights you see come from an incoming or escaping ship, or if you wonder if the ship is a fishing trawler or a super tanker, then the LIGHTrule is for you.

This easy-to-use ship identification tool is an inexpensive security measure for night-time travel and should be an essential part of any boat. The LIGHTrule is also a great help during navigation classes and exams.

It identifies all USCG Colregs
It shows a real view of the ships on the left, right side, bow and stern.
Identifies 60 configurations of navigation lights
Equipped with a magnifying lens for easy reading of descriptions
Displays horn signals for limited visibility, manoeuvring and warning
Made of extremely durable plastic
Storage in vinyl sleeve

Weight: 0.4 pounds (182 g)
Dimensions: 16″ x 5-1/4″ (407 x 133 mm)
