Cylinder shaped rope bag w/ backpack function – EMG 4498

This bag has two handles on the sides of the bag to ease handling.

- The inside of the bag contains one large compartment.
- 4498 comes with an additional insert of hard plastic to make the bag stable, upright and increase the light inside.
- The hard bottom is made out of hard plastic to make the bag keep in shape and prolong the life of the bag.
- The bottom is replaceable and can be easily replaced if needed.
- A large see-through pocket for A4-sized paper is placed on the outside of the bag.
- The shoulder straps are padded to enhance comfort and adjustable in length to fit your preferences.
- The top of the bag is simply closed using a plastic buckle.
- The side of the bag has securing eyes/holes for securing tools or attaching the bag to your belt when working in heights.
- It is possible to fit 200 meters of rope inside the bag.
