Signal Orange Smoke CF3 -SOLAS- PyroPol

Compact, buoyant daytime orange smoke distress signal providing effective position marking or indicate wind direction

The PyroPol Signal Orange Smoke CF3, conforming to SOLAS/MED/USCG, is a compact, buoyant daytime orange smoke distress signal designed to be easy and safe to handle – even on oil or petrol covered water. It provides effective position marking during rescue operations and can be used to indicate wind direction, producing dense orange smoke for a minimum of 3 minutes.

Required in liferafts and lifeboats.
Recommended for all types of water vehicles– whether on business or leisure.
