Lifting bag with trolley function – EMG 5221

Has a hidable telescopic handle to ease handling and use.

- The straps and handles are made from high quality polyester webbing.
- The new 5221 has four wheels on the bottom of the bag giving it a trolley function.
- The wheels are made of heavy duty plastic.
- The bag has one handle mounted on the side front of the bag to ease handling.
- A hard plate is placed inside the bottom and the back of the trolley.
- Hard plastic plates are placed inside the walls all the way around the bag making it stable and upright.
- The corners of the bag have plastic protection covers.
- Closing the bag tight for travel or other transportation can be done with a carabiner.
- The inside of the bag contains one large main compartment.
