Square tool bag w/ side gate – EMG 4786

4786 uses 4 lifting straps when hoisting.

- 2 handles are placed on the bag. One on each of the sides.
- The lifting straps are made from high quality polyester webbing.
- A 20 mm bottom plate of hard PE is placed inside to strengthen the bag and ensure optimal weight distribution.
- 10 mm plastic plates are placed inside three of the walls to keep the bag upright and stable.
- The last wall functions as a gate for easy access when the bag is grounded.
- The gate is closed by zippers.
- The lid is closed by velcro.
- Each of the plates can be removed from the bag. This is handy for saving up space when transporting or storing the bag.
- The bottom cover is made of PEHD plastic to prolong the bag’s service time.
- The bottom cover can easily be replaced, if needed.
