Findaport.com

Online port information. Same information as is available within *Guide to Port Entry* but updated daily.

Updated daily findaport.com is a fully searchable, easy-to-use online service to help those within the maritime industry find information on over 9,000 ports, harbours and terminals worldwide, including port plans, maps and photographs.

Search by country, port name, location coordinates, facilities (airport, fuel, surveyors, water, ballast, slops, banks, medical, tugs, ISPS and waste), cargo facilities (bulk, cranes, gas, containers, cruise, tankers and offshore) and drydock facility sizes.

Access detailed port information which has been researched and collated by eam of ex-mariners using only authenticated

sources such as port authorities, agents and operators. With over 70 headings available, port data is categorised and listed in logical sequence for easy reference.

Port plans, maps and photographs provide additional information to detail the port's layout and facilities available.
