Semmco HEAD15 Escape – 15-minute escape breathing apparatus

Semmco HEAD15 Escape is a head-worn breathing apparatus for evacuation through smoke, contamination or oxygen-deficient atmospheres. Its design leaves both hands free and avoids carrying a compressed-air cylinder.

Manufacturer: Semmco LPS
Escape duration: 15 minutes
Duration at rest: up to 30 minutes
Apparatus weight: approximately 1.6 kg
Storage: up to 12 years, with revalidation at years 6 and 9

Features automatic oxygen delivery, a panoramic visor and an integral alarm. This model is intended for escape. Use and inspect in accordance with the manufacturer’s instructions.
