Semmco HEAD15 Working/Rescue – breathing apparatus

Semmco HEAD15 Working/Rescue is a head-worn oxygen apparatus for work and rescue in smoke, contamination or oxygen-deficient atmospheres. This version is tested at a higher breathing rate than the escape models.

Manufacturer: Semmco LPS
Work/rescue duration: 15 minutes
Duration at rest: up to 45 minutes
Apparatus weight: approximately 1.6 kg
Storage: up to 12 years, with revalidation at years 6 and 9

Automatic activation and an integral alarm support operation, while the head-worn design leaves both hands free. Selection requires a task-specific risk assessment. Follow the manufacturer’s instructions.
