Semmco Marine 15 EEBD – marine escape breathing device

An oxygen escape device for evacuation from contaminated or oxygen-deficient atmospheres on board ships. The closed circuit uses KO_2 and oxygen delivery starts automatically when the unit is removed from its case.

Manufacturer: Semmco LPS
Model: Marine 15 EEBD
Escape duration: 15 minutes
Duration at rest: up to 60 minutes
Weight: approximately 1.3 kg (2 kg with case)
Storage: up to 15 years under the manufacturer’s conditions

The orange case includes a visual condition indicator and a neck strap supports the apparatus. Intended for escape, not for work or rescue in hazardous areas.
