Semmco Industrial 20 EEBD – emergency escape breathing device

Semmco Industrial 20 EEBD is a self-contained oxygen escape device for evacuation from contaminated or oxygen-deficient environments. Its closed circuit uses a chemical oxygen source (KO_2), with automatic activation when removed from the case.

Manufacturer: Semmco LPS
Model: Industrial 20 EEBD
Rated escape duration: 20 minutes
Duration at rest: up to 60 minutes
Weight: approximately 1.3 kg (2 kg including case)
Storage life: up to 15 years, subject to the manufacturer’s conditions

The rigid orange case has a visual condition indicator. A neck strap supports the device and the bright breathing bag improves visibility. Designed for escape, not for entry or rescue work. Inspect and use in accordance with the manufacturer’s instructions.
