

Handflare White CF3 PyroPol

A Handheld distress signal for collision warning and for illuminating small areas for use during day and night.

The Handflare White CF3 is used for collision warning and for illuminating small areas. Designed to withstand even exceptional environmental conditions and to ensure reliable operation even after immersion in water. The ignition at the bottom of the handflare, the cold end of the handflare, by firing pin, guarantees a safe and easy handling. The handflare is burning drip free for 60 seconds at a light intensity of

3.000 candela. After activating the hand flare continues to burn even underwater.

Recommended for all types of boats – whether for business or leisure.
